

## Our Mission

Promax Engineering is the marketing, engineering and technical service partner with over ten manufacturing companies in China. Our mission is to provide a total cost reduction and offshore outsourcing solution for US manufacturers. We have experienced years of growth as more and more companies have discovered the benefits of Promax Engineering for cost reduction and quality improvement.

A warehouse located in Michigan ensures that products are delivered to customers on time. Promax Engineering and our partners in China share the same philosophy - "customer satisfaction is always our top priority".

Promax Engineering and our partners are uniquely positioned to respond to current market concerns, and commit to our customers with quality control, competitive price and on time delivery. All of our manufacturing partners in China are selected based not only on their manufacturing capabilities but also their quality control systems. All of our partners are QS or/and ISO certified.

Products are inspected both in production processes and at the end of processes.

Additionally, in order to keep our commitment to quality, senior engineers at our Shanghai office work closely with our partners to monitor the entire ordering process and control quality. Moreover, they will conduct final product inspection before each shipment.

### Engineering Team

Engineers in the US are highly experienced professionals with advanced

Mechanical Engineering degrees. They work closely with our customers to ensure the requirements and specifications are well understood. Engineers in Shanghai office are also degreed and certified experts with more than 10 years experience working with foreign companies. They work with our partners in the entire production process to assure that projects meet the time line and quality standards.

### Engineers' Mission

■ **Meeting** with customers and the partners to assure technical and quality requirements are understood.

■ **Leading** FMEA and quality control plan on the site of supplier's factory, reviewing tooling design and construction, molding design, tooling, gauging and manufacturing process with partners to guarantee that the customer's requirements are met.

■ **Developing** a detailed schedule with milestones to enable efficient and effective monitoring of production progress.

■ **Developing** a project quality assurance program to guarantee specification compliance.

■ **Monitoring** production progress and taking corrective actions when necessary to assure timeliness.

■ **Auditing** and inspecting to confirm that the parts are conforming to the specifications.

■ **Maintaining** current status of each supplier with respect to management, workload, financial situation and any other factors that could affect quality or timeliness.

■ **Drawing** conversion from English to Metric.

### Quality Team

Quality engineers in Shanghai office possess mastery of US standards such as ASTM and SAE. They have years of

experience in manufacturing on castings, machining, plastics and sheet metals. Particularly they are proficient in using various kinds of measuring instrument. They visit partners frequently to make sure that the quality standards are strictly adhered to.

### Quality Team's Mission

■ **Quality system assessment** to make sure that ISO9001 or QS9000 is implemented.

■ **Leading** R&R study on the site of supplier's factory.

■ **Leading** quality improvement and corrective actions.

■ **Inspecting** to confirm that the parts are conforming to the specifications through standard testing and inspection methods prior shipping.

■ **Assisting** customers to support 3rd party (measuring agency) to check parts.

### Logistic

#### Customs Clearance

We are familiar with dealing customs issues for goods imported from China and able to clear shipments at a number of locations throughout the United States.

#### Logistics

We are able to consolidate shipments from overseas in order to maintain low cost and provide improved scheduling. In addition, we can handle domestic freight and break out of containers or coordinate this with your preferred carrier.

### Payment Terms

We offer a variety of payment terms to accommodate our customers ranging from Transferable Letter of Credit to 30 day open account and consignment.
